

Updated 2020 production guidance to reflect the Norwegian Government production restrictions and increased long-term production guidance

Lundin Energy AB (Lundin Energy or the Company) announces that following the decision made by the Norwegian Government to implement production restriction measures on the Norwegian Continental shelf, the Company's updated production guidance for the full year 2020, will be targeting 157 thousand barrels of oil equivalent per day (Mboepd). This is at the top end of the original guidance range for 2020 of 145 – 165 Mboepd, which was subsequently upgraded, to 160 – 170 Mboepd, prior to the production cuts announced by the Norwegian Government.

Updated guidance:

	Updated	Previous
2020 Production	Targeting 157 Mboepd	160 – 170 Mboepd
2020 Operating Cost	USD 2.80 per boe	USD 2.80 per boe
Long term Production	170 – 180 Mboepd	160 – 170 Mboepd

The production restriction measures being introduced will impact production output from the Company's assets from June through December 2020, with unrestricted production levels resuming at the beginning of 2021. In addition, to take advantage of excess production capacity, the planned maintenance shutdown on Edvard Grieg, that was previously deferred from 2020 to 2021, will now be expedited to take place in the third quarter of 2020.

Due to the recently announced increased production capacity at Johan Sverdrup, the Company is increasing its long term production guidance to 170 – 180 Mboepd from 2021, from the previous guidance of 160 – 170 Mboepd.

Operating cost guidance for 2020 remains unchanged at USD 2.80 per boe, which highlights the high operating efficiency of the portfolio.

Lundin Energy is one of Europe's leading independent oil and gas exploration and production companies with operations focused on Norway and listed on Nasdaq Stockholm (ticker LUNE). Read more about Lundin Energy's business and operations at www.lundin-energy.com

Forward-looking statements

Certain statements made and information contained herein constitute "forward-looking information" (within the meaning of applicable securities legislation). Such statements and information (together, "forward-looking statements") relate to future events, including Lundin Energy's future performance, business prospects or opportunities. Forward-looking statements include, but are not limited to, statements with respect to estimates of reserves and/or resources, future production levels, future capital expenditures and their allocation to exploration and development activities, future drilling and other exploration and development activities. Ultimate recovery of reserves or resources are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management.

All statements other than statements of historical fact may be forward-looking statements. Statements concerning proven and probable reserves and resource estimates may also be deemed to constitute forward-looking statements and reflect conclusions that are based on certain assumptions that the reserves and resources can be economically exploited. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar expressions) are not statements of historical fact and may be "forward-looking statements". Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. No assurance can be given that

these expectations and assumptions will prove to be correct and such forward-looking statements should not be relied upon. These statements speak only as on the date of the information and Lundin Energy does not intend, and does not assume any obligation, to update these forward-looking statements, except as required by applicable laws. These forward-looking statements involve risks and uncertainties relating to, among other things, operational risks (including exploration and development risks), production costs, availability of drilling equipment, reliance on key personnel, reserve estimates, health, safety and environmental issues, legal risks and regulatory changes, competition, geopolitical risk, and financial risks. These risks and uncertainties are described in more detail under the heading “Risk management” and elsewhere in Lundin Energy’s Annual Report. Readers are cautioned that the foregoing list of risk factors should not be construed as exhaustive. Actual results may differ materially from those expressed or implied by such forward-looking statements. Forward-looking statements are expressly qualified by this cautionary statement.
