LONG HISTORY OF VALUE CREATION

Los Helados

- One of the world's largest undeveloped copper projects- #11
- 10 million ounces gold;
- 92 million ounces silver
- A key deposit in the Vicuña District

Valle Ancho

- Large, high potential copper-gold exploration project

Well Funded

- \$25M financing @\$0.80; October 2021

Strong track record

- NGEX team's copper discoveries have created market value of >\$3 billion

VICUÑA
A MAJOR NEW
COPPER DISTRICT
controlled by Lundin
Group companies

GIANT METAL DISTRICTS ARE UNIQUE & COMPLEX BUT MOST SHARE 3 SIMPLE GIANT CHARACTERISTICS:

1

Scale

Big systems- typically outsized for their deposit class

2

Clusters

They commonly offer a regional cluster of giant ore deposits

3

Ore Structures

Big, long-life faults

Vicuña is an emerging super giant..

Super giant by definition.

“Giant” is not a superlative or promotional description.
Size of districts are formally classified and quantified by
industry academia.

A.H.Clark, Society of Economic Geologists (SEG), Special
Publication No. 2, 1993.

SIZE CLASSIFICATIONS Based on contained copper metal

WHEN YOU FIND SOMETHING BIG, **THINK BIGGER**

- **Giant metal districts:**
- The Holy Grail of the mining business
- Geological “freaks of nature”
- Hard to find, easy to overlook
- Good surprises

CURRENT INDUSTRY GIANTS

Escondida, Chile

31 years of Cu production; 55+ years of reserves

Chuquibambilla, Chile

>100 years of Cu production; 35+ years of reserves

Red Dog, Alaska

32 years of Zn-Pb production; 20+ years of reserves

Grasberg, Indonesia

48 years of Au-Cu production; 20+ years of reserves

Magnetics mark trace of NNE Filo-Los Helados Structure, and regionally important NW structures

Resistivity low (blue) outlines overall system

Within the resistivity low, very low values (pink-purple) appear to correlate with known higher grade zone

LOS HELADOS - 2022 PROGRAM

THE QUEST FOR GRADE

De-Risk Project
with additional
drilling to test possible
extensions of high grade

Step 1: Drill out high grade
core; up to 16,000m*
Step 2: Update resource,
metallurgy, geotech

Evaluate mining options
to optimize head grade,
reduce capital and
timelines

* actual metres drilled will depend on drilling
rates and weather conditions

VALLE ANCHO COPPER-GOLD PROJECT

EXPLORATION UPSIDE

- Underexplored 100,000 Ha land package
- Argentina side of the Maricunga Gold Belt >100Moz on Chile side
- Along the crustal scale Valle Ancho lineament
- No exploration for almost 20 years
- Option to earn 100% from Catamarca Provincial Government

2022 DRILL PROGRAM
8 holes/ ~3,000m

RESULTS
Q1-Q2 2022

NORDIN GOLD TARGET

GOLD PORPHYRY + EPITHERMAL HIGH SULFIDATION MINERALIZATION

- Large scale gold target
- Recent diamond drilling intersects gold from surface
 - 150m @ 1.05 g/t Au; incl. 124m @ 1.2 g/t Au
 - 198m @ 0.63 g/t Au; incl 70 @ 0.9 g/t Au
- Mineralization oxidized to ~200m

* See News Release dated February 28, 2022

LA QUEBRADA TARGET

GOLD RICH PORPHYRY COPPER

- Large 2.5 x 0.85 Km zone of hydrothermal alteration exposed in an erosional window
- Mineralization appears to extend under younger cover rocks
- 5 diamond drill holes at approx. 500m spacing;
- Results pending

INVESTMENT SUMMARY

- The right projects- the right time
- Los Helados is a key strategic resource in an emerging giant district. **High potential brownfields drilling**
- Valle Ancho exposure to grassroots exploration success
- 2022 will be news and catalyst rich
- Up to 19,000m of drilling planned across portfolio
- Experienced, successful team

**THIS IS THE START
OF THE NEXT BIG THING**

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements made and information contained herein in the presentation constitutes “forward-looking information” and “forward-looking statements” within the meaning of applicable securities legislation (collectively, “forward-looking information”). The forward-looking information contained in this presentation is based on information available to the company as of the date of this presentation. Except as required under applicable securities legislation, the company does not intend, and does not assume any obligation, to update this forward-looking information. Generally, this forward-looking information can frequently, but not always, be identified by use of forward-looking terminology such as “plans”, “expects” or “does not expect”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates” or “does not anticipate”, or “believes”, or variations of such words and phrases or statements that certain actions, events, conditions or results “will”, “may”, “could”, “would”, “might” or “will be taken”, “occur” or “be achieved” or the negative connotations thereof. All statements other than statements of historical fact may be forward-looking statements.

Forward-looking statements contained in this presentation include statements regarding a repeatable business model, exploration upside, and shareholder returns. Information concerning mineral resource estimates are also forward-looking statements in that they reflect a prediction of the mineralization that would be encountered, and the results of mining, if a mineral deposit were developed and mined. Although NGEX Minerals believes that the expectations reflected in such forward-looking statements and/or information are reasonable, undue reliance should not be placed on forward-looking statements since NGEX Minerals can give no assurance that such expectations will prove to be correct. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements, including the risks, uncertainties and other factors identified in NGEX’s periodic filings with Canadian securities regulators, available under the company’s profile at www.Sedar.Com.

These factors are not, and should not be construed as being, exhaustive. Although the company has attempted to identify important factors that would cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated, or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. All of the forward-looking information contained in this document is qualified by these cautionary statements. Readers are cautioned not to place undue reliance on forward-looking information due to the inherent uncertainty thereof.

Estimates of Mineral Reserves and Mineral Resources

Information regarding reserve and resource estimates has been prepared in accordance with Canadian standards under applicable Canadian securities laws, and may not be comparable to similar information for United States companies. The terms “Mineral Resource”, “Measured Mineral Resource”, “Indicated Mineral Resource” and “Inferred Mineral Resource” used in this presentation are Canadian mining terms as defined in accordance with NI 43-101 under guidelines set out in the Canadian Institute of Mining, Metallurgy and Petroleum (“CIM”) Standards on Mineral Resources and Mineral Reserves adopted by the CIM Council on May 10, 2014. While the terms “Mineral Resource”, “Measured Mineral Resource”, “Indicated Mineral Resource” and “Inferred Mineral Resource” are recognized and required by Canadian regulations, they are not defined terms under standards of the United States Securities and Exchange Commission. Under United States standards, mineralization may not be classified as a “reserve” unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve calculation is made. As such, certain information contained in this presentation concerning descriptions of mineralization and resources under Canadian standards is not comparable to similar information made public by United States companies subject to the reporting and disclosure requirements of the United States Securities and Exchange Commission. An “Inferred Mineral Resource” has a great amount of uncertainty as to its existence and as to its economic and legal feasibility. It cannot be assumed that all or any part of an “Inferred Mineral Resource” will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. Readers are cautioned not to assume that all or any part of Measured or Indicated Resources will ever be converted into Mineral Reserves. Readers are also cautioned not to assume that all or any part of an “Inferred Mineral Resource” exists or is economically or legally mineable. In addition, the definitions of “Proven Mineral Reserves” and “Probable Mineral Reserves” under CIM standards differ in certain respects from the standards of the United States Securities and Exchange Commission. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.

Qualified Persons

The disclosure of scientific and technical information regarding the Company’s properties in this presentation was prepared by or reviewed Bob Carmichael, B.A.Sc., P.Eng., who is the Qualified Person as defined by NI 43-101. Mr. Carmichael is Vice President, Exploration for the Company.

Technical Reports

For details on data verification, sample, analytical and testing results and further details regarding methods used to estimate mineral reserves in respect of the Los Helados project, refer to the technical report on the Los Helados Porphyry Copper-Gold Deposit Chile” dated August 6, 2019 (effective date April 26, 2019), which incorporates the mineral resources statement for Los Helados is available on SEDAR.

0.33	2,099	0.38	0.15	1.37	0.48	17.6	10.1	92.5
Los Helados Inferred Mineral Resource								
	Tonnage	Resource Grade				Contained Metal		
Cutoff (CuEq)	(million tonnes)	Cu (%)	Au (g/t)	Ag (g/t)	CuEq (%)	Cu (billion lbs)	Au (million oz)	Ag (million oz)
0.58	There are no Inferred Mineral Resources inside the mining shape at this cutoff grade							
0.50	41	0.41	0.13	1.78	0.51	0.4	0.2	2.3
0.44	176	0.37	0.11	1.61	0.45	1.4	0.6	9.1
0.40	399	0.35	0.10	1.47	0.43	3.1	1.3	18.9
0.33	827	0.32	0.10	1.32	0.39	5.8	2.7	35.1

For details on data verification, sample, analytical and testing results and further details regarding methods used to estimate mineral reserves in respect of the Los Helados project, refer to "The Technical Report on the Los Helados Porphyry Copper-Gold Deposit Chile" dated August 6, 2019 (effective date April 26, 2019), which incorporates the mineral resources statement for Los Helados and is available on SEDAR.

Notes to accompany Los Helados Mineral Resource table

Mineral Resource estimate has an effective date of April 26, 2019. The Qualified Person for the estimate is Mr. Gino Zandonai, RM CMC.

Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability

Mineral Resources are reported using a copper equivalent (CuEq) cutoff grade. Copper equivalent is calculated using US\$3.00/lb copper, US\$1,300/oz gold and US\$23/oz Ag, and includes a provision for selling costs and metallurgical recoveries corresponding to three zones defined by depth below surface. The formulas used are: $CuEq\% = Cu\% + 0.6264 \cdot Au (g/t) + 0.0047 \cdot Ag (g/t)$ for the Upper Zone (surface to ~250 m); $Cu\% + 0.6366 \cdot Au (g/t) + 0.0077 \cdot Ag (g/t)$ for the Intermediate Zone (~250 m to ~600 m); $Cu\% + 0.6337 \cdot Au (g/t) + 0.0096 \cdot Ag (g/t)$ for the Deep Zone (> ~600 m)

Cutoff grades refer to diluted cutoff grades used to generate the corresponding block cave shapes. For each cutoff grade, the tonnes and grade represent the total Indicated or Inferred undiluted material within each of these shapes.

Mineral Resources are reported within block cave underground mining shapes based on diluted CuEq grades, US\$13.07/t operating costs and include a provision for capital expenditure. The base case cutoff grade of 0.33% CuEq was derived through an economic evaluation of several block cave shapes developed over a range of different cutoff grades and is the cutoff grade which results in a zero net present value

Totals may not sum due to rounding as required by reporting guidelines

LEADERSHIP TEAM- EXPLORATION EXPERIENCE

Management

WOJTEK WODZICKI
CEO & Director

Geology Ph.D, P. Geo >30 years international exploration management and business experience. With Lundin Group since 2007. Previously with Teck.

BOB CARMICHAEL
VP Exploration

Geological Engineer, P. Eng. 30 years international experience. Strong background in exploration project management and resource estimation.

JEFF YIP
CFO

Chartered Accountant. CPA, Strong background in financial management and reporting.

Board

BILL RAND
Chairman

Securities Lawyer (ret.)
Senior Business Adviser to
Lundin Group Companies
for more than 35 years.
