

LUNDIN FAMILY BRAIN TUMOUR RESEARCH CENTRE

JANUARY 2023

Lundin Insider Report

Funding the Very Best in Brain Cancer Research

Our goal is to make a high impact investment in brain cancer research that significantly benefits patients and for them to know that they are not alone in their fight.

The Lundin Family are committed to raising awareness and funding to help advance brain cancer research in a meaningful way. We very much appreciate your donation and welcome you as a valued "insider" of this important project to the Lundin Family. We look forward to keeping you up to date with our progress.

Lukas Lundin

When Lukas Lundin was diagnosed with glioblastoma in 2020, it became immediately clear that there was a significant lack of awareness and treatment options for brain cancer. Lukas wanted to change this. As a result, he and his family founded the Lundin Family Brain Tumour Research Centre at the Lausanne University Hospital (CHUV). Not only did he like the fact that CHUV is one of the top cancer research hospitals in the world but he particularly liked their collaborative approach.

Lukas H. Lundin

1958-2022

Lukas died at the age of 64 from glioblastoma, a form of brain cancer.

As we welcome in a new year, we first and foremost want to send you our very best wishes and much health and happiness in 2023.

What's New

There is a lot happening at the Lundin Family Brain Tumour Research Centre thanks to your donations!

Work at the Centre is being structured around three axes:

- Lundin-CHUV Open Access Brain Tumour Database with a Research Support Unit**
 - Aims to be the largest and most comprehensive open access brain tumour database
 - Over 500 Glioblastoma tissue samples already available
 - Includes all types of brain tumours
 - Only database to collect clinical, omics, radiomics and neuropathological data
 - Designed to be accessible to researchers from all over the world
- The Lundin-CHUV Grant program**
 - Supporting 5 key innovative clinical trials
 - Projects linked to the Lundin Database
 - Aims to promote internal, national & international collaborations
- The Lundin-CHUV Fellowship in Neuro-Oncology Program**
 - Provides cutting-edge training in clinics and research for physicians interested in neuro-oncology
 - Develops a network of the very best specialists in this field to provide a new level of care and treatment

LUKAS' LIFE JOURNEY WAS A REMARKABLE ONE.

He was a man who made a difference in this world. Thank you for helping us continue that journey.

Entrepreneurial, and always adventurous, he was passionate about the resource industry and its power to transform lives. From the high Andes of Argentina to the jungles of Ecuador, he pursued opportunities that led to some of the largest and most successful resource developments in the world.

We're Gearing Up for the Mount Everest Challenge!

Jack and William Lundin will be climbing Mount Everest this spring to raise awareness and funding for Glioblastoma research. A blog of their epic journey will be on www.thelundinggroup.com

Each step will be in honour of their dad, Lukas Lundin.

The climb will be filmed and made into a documentary about Lukas' inspiring life. The working title for the film about Lukas is "No Limit". Please [click here](#) to see the trailer.

Stay tuned as we announce sponsorship and fundraising opportunities. Let's join their journey!

Did you know?

Survival rates and mortality statistics for Glioblastoma have remained virtually unchanged for decades.¹ The Lundin Family Brain Tumour Research Centre wants to help change this.

Thank you!

Thank you for your support and being part of Lukas Lundin's legacy. Together we are pushing the boundaries of brain cancer research and treatment innovation.

In the next issue we'll meet some of the key people at the Lundin Family Brain Tumour Research Centre.
